Company Overview

Amalgam is a digital health technology company that develops mobile solutions to drive behavioral and clinical change in chronic disease. Amalgam's goal is to improve patient self-management and help healthcare providers improve decision making to improve clinical outcomes and decrease cost. Amalgam is developing multiple digital health solutions across the chronic disease spectrum. Digital health solutions have the potential to support the gap between patients and providers during the time that individuals are living their lives outside the healthcare system. Amalgam has a proven executive team and has partnerships with leading life sciences companies to accelerate R&D and commercialization.

Job Purpose

The Sr. Design Strategist will join Amalgam to support the development of digital medicine and therapeutics products. The initial focus will be on developing a mobile and web solution that supports patients and healthcare providers in the management of chronic disease. The role calls for an interaction designer who has worked in healthcare and is passionate about transforming the way care is delivered to patients. As this talented and self-motivated individual grows in seniority and responsibility, they will drive organizational creativity and take Amalgam to new heights.
